

PROJECT HELIOS: POST-QUANTUM FORENSIC BRIEFING

CLASSIFICATION: TOP SECRET // AIR-GAPPED DISTRIBUTION ONLY

Executive Summary & Operational Mandate

1. This document is protected by NIST FIPS 203 (ML-KEM-768) and FIPS 204 (ML-DSA-65).
2. Any decryption action constitutes a non-repudiable legal acknowledgement.
3. Decryption embeds an invisible cryptographic watermark bound to the authorized recipient.
4. Decryption records are immutably hash-chained in an append-only audit ledger.
5. Unauthorized exfiltration or unauthorized distribution will be forensically attributed.

Operational Directives:

- Enclave systems must maintain strict air-gap integrity.
- Cryptographic private keys must never cross network boundaries.
- Recipient provenance is mathematically verifiable even if standard file metadata is altered.
